The Chemical Company

# Astacin® Finish PE

## Discover the new way of leather finishing

Astacin® Finish PE is a perfect addition to the BASF NMP-free product range. That is because it is an extremely tough polyurethane binder with excellent fastness and cold flex properties. As a result leather for items such as shoe uppers and automotive interior will keep their high performance even in the coldest of climates. But that is not all. Astacin® Finish PE is absolutely resistant against hydrolysis and very low in VOC content.

### Impressive benefits:

- High-performance polyurethane binder
- Absolutely resistant against hydrolysis
- Low VOC content
- NMP-free
- Leathers do not stick when they are piled, plated, or embossed
- Good embossing results
- Excellent covering
- High flexibility even at low temperatures
