The Chemical Company

Lepton® Aquatop TG

The best designs demand Lepton® Aquatop TG

As a top-coat leather application, Lepton® Aquatop TG represents a simple but effective way to obtain a transparent high-gloss finish. And Lepton® Aquatop TG can be combined with many other products. Working with casein binders like Luron® makes it easy to achieve beautiful, glossy surfaces. Combining Lepton® Aquatop TG with Luron® Top is all it takes to produce flawless transparent finishes. Good results in wet rub fastness are increased by adding silicon waxes such as Lepton® Wax WN or by using cross-linking agents. And the product offers an excellent price-performance ratio. Best of all, it can be used for all kinds of leather, even if its advantages specially shine through with shoe uppers, furniture, and garment leather.

Impressive benefits

- Excellent fastness level
- Very good leveling by spraying and coating
- Natural look and transparent gloss
- Excellent price-performance ratio
- Suitable for all kinds of leather finishing
- Very low VOC
- Free of APEO and tin-organic products
