The Chemical Company

Lepton® Matting EO

Good price to performance ratio

Lepton® Matting EO is one of a new generation of products for formulating environmentally friendly, cost-effective acrylic-based topcoats for automotive leather. It has excellent fastness properties, and performs very well in combination with polyurethane binders in topcoats. In addition the product has good fastness in terms of heat yellowing. Leathers in light colors finished with Lepton® Matting EO are more resistant to soiling and easier to clean. Lepton® Matting EO can be used for all types of leather, and it is especially recommended for automotive leather.

Impressive benefits

- Low gray-break
- Improves soiling behavior
- High fastness profile for light colors
- Excellent lightfastness and heat-resistance for light colors
- Free of plasticizer
- VOC-free (<1%)
- Low emissions
