

Relugan[®] FS

Extremely low emissions: Relugan[®] FS

- Free of formaldehyde
- Free of monomers
- Free of inorganic salts
- Free of phenol
- Free of odor
- Low VOC content
- Low COD

Brilliant Solutions with
Leather Technology from BASF

 **BASF**

The Chemical Company

Relugan[®] FS

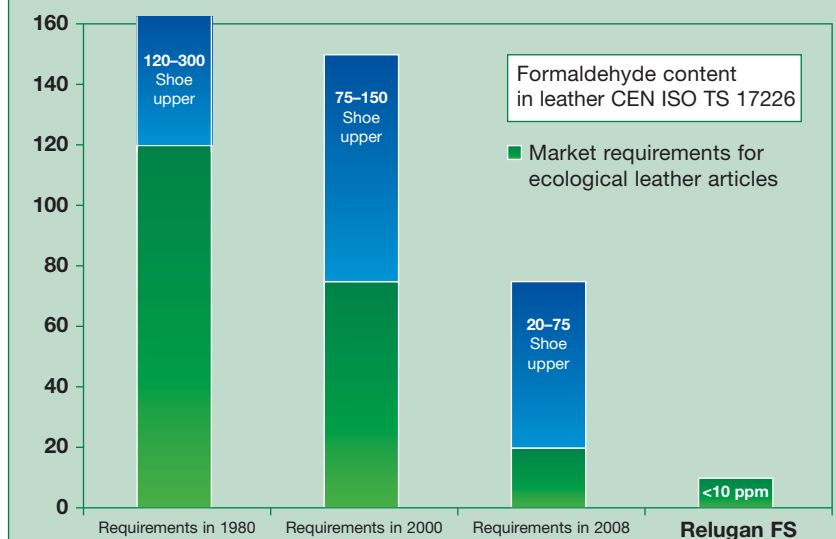

Demand the highest standards – for the environment, too: Relugan[®] FS

For a high-performance retanning agent which meets stringent ecological demands – insist on Relugan[®] FS. It is free of formaldehyde, monomers, and inorganic salts. So naturally, it is recommended for processing high-quality leathers such as those used in the automotive and children's footwear segment. Relugan[®] FS also gives the leather a pleasant handle, excellent fullness, and a smooth tight grain. It shows good results in lightfastness, heat resistance, and resistance to migration. Relugan[®] FS combines important ecological advantages with excellent fastness results, fullness, and smooth tight grain.

Development of formaldehyde requirements in the market

Impressive benefits:

- Free of formaldehyde
- Free of phenol
- Free of monomers
- Free of inorganic salts
- Free of odor
- Low VOC content
- Low COD
- Excellent lightfastness
- Resistance to migration
- Good heat resistance
- Fullness and smooth tight grain
- Pleasant look and feel
